No.	Project Name
1	Employee Management System
2	Student Management System
3	Customer Management System
4	Product Management System
5	Book Management System
6	Library Management System (Books Only)
7	Mobile Store Management System
8	Laptop Store Management System
9	Vehicle Management System
10	Movie Management System
11	Hospital Patient Management System
12	Doctor Management System
13	Gym Member Management System
14	Bank Account Management System
15	Hotel Room Management System
16	Bus Management System
17	Flight Management System
18	Blood Donor Management System
19	Electricity Consumer Management System
20	Water Connection Management System

Common Functionalities (For Every Project)

Students must implement the following operations:

Insert Record

Update Record

Delete Record

Search Record by ID

Display All Records

Search by Name

Count Total Records

Exit

Mandatory Concepts

JDBC

DAO Pattern

CRUD Operations

PreparedStatement

ResultSet

Connection

Statement (where applicable)

MySQL Database

Menu-Driven Console Application

Proper Package Structure

Suggested Package Structure

com.project

```
├── dao
│   ├── EntityDAO.java
│   └── EntityDAOImpl.java
│
├── dto
│   └── Entity.java
│
```

```
├── util
│   └── DBConnection.java
│
└── main
    └── Main.java
```

Submission Requirements

Each student should submit:

Java source code

SQL table creation script

DAO Interface

DAO Implementation

DTO/Model class

DBConnection class

Main class with menu-driven operations

Output screenshots
